Internships

June 2024 - July 2024	Node Js Intern, Tuvoc Technology Pvt. Ltd. (on-site) As an intern at Tuvoc Technology, I learned about Sequelize, Node.js, Express, MySQL, and Multer firsthand. During my one-month internship, I developed a client management system, integrated image and video uploads, and implemented intricate database linkages. Additionally, I worked on a project aimed at efficiently handling and filing complaints, which helped me improve my backend development and database management skills.
Dec 2023 - Feb 2024	DevNullIX Technology Pvt. Ltd. Developed a Salesman Expense and Data Tracking System using Python-Django to track expenses by calculating distances with the MapMyIndia API, based on coordinates entered by salesmen during their activities. The system then visualizes sales routes and locations on an interactive map using Folium, optimizing route management and performance monitoring. Contributed to the RaagViraag project, by creating a user-friendly backend for blog content management and designed the user interface using Python-Django.

Extra-curricular Activities

Feb 2024 - March 2024	Organising Team Member, Hack The Spring Hackathon As the organizing Team Member of "Hack the Spring", one of Hackathons powered by Google GenAI, I coordinated a team to plan and execute the event, managing logistics and communications. This role enhanced my team Work, project management, and problem-solving skills, ensuring a successful experience for over 400 participants, with over 750 registrations in just 20 days.
